

Registration status reconciliation

Illustrative source input

These small fixture records are fictional. They show the input shape and the decisions a reviewer must make. They are not data exported from a connected customer account.

Registration	Status	Capacity group
EV01	confirmed	session A
EV02	duplicate candidate	session A
EV03	waitlist	session A

Review rule

Registration status does not authorize an admission decision. Keep identifiers and observed statuses intact.

Registration status reconciliation

Worked output excerpt

Source or item	Delivered observation or proposed result
EV01	confirmed record retained
EV02	owner review, no automatic removal
EV03	waitlist retained, not admitted

How to inspect this example

Compare each result with its source row. Missing information stays unresolved. Proposed changes remain separate from observed facts. Download the accompanying JSON to inspect the input and output without a screenshot.

Scope of this sample

This is a shared, app-neutral worked excerpt, not a complete paid package, a client case study or a live integration test. A real delivery uses the agreed source files, quantities, formats and acceptance checks. Application-specific export schemas and connected permissions must be verified separately.
